

How to add a title, sections and a contents page

Anas Syed

July 28, 2015

Contents

1	This is the first section	3
1.1	This is a subsection heading	3
1.1.1	This is a subsubsection heading	3
1.2	This is another subsection	3
2	This is another section	3
2.1	Subsection	4
2.2	A third subsection	4

1 This is the first section

To make a title, you need to do two things. First, add at least one of the following lines to the preamble:

```
\title{How to add a title, sections and a contents page}  
\date{\today}  
\author{Anas Syed}
```

Then, add the `\maketitle` command anywhere in the document. You could even have the title at the bottom!

To add the contents page, just add the `\tableofcontents` command anywhere in the document.

1.1 This is a subsection heading

This is the subsection content. You can use sections, subsections, subsubsections and paragraphs to organise your document.

1.1.1 This is a subsubsection heading

This is the subsubsection.

1.2 This is another subsection

Hello

This is the paragraph title This is the paragraph content.

2 This is another section

Notice how the sections are numbered:

2.1 Subsection

This subsection is numbered 2.1. If you don't want to number a section, just put an asterisk after the command, like so:

```
\subsection*{Another subsection}
```

Another subsection

Here is another subsection, but here you can see it has not been numbered due to the use of an asterisk.

2.2 A third subsection

As you can see, this subsection is numbered as 2.2, because the previous subsection skipped the numbering.
