Here, we shall create lists using the `enumerate` package.

1 Bullet points

Bullet points are created using `itemize`:

- Red
- Yellow
- Green

2 Numbers

Numbered lists are created using `enumerate`:

1. Football
2. Rugby
3. Cricket

3 Custom

Custom worded lists are created using `description`:

First Place the eggs in a single layer at the bottom of a saucepan. Cover with at least an inch or two of cold water

Second Turn off the heat, keep the pan on the hot burner, cover, and let sit for 10-12 minutes

Finally Strain out the water from the pan and run cold water over the eggs to cool them quickly and stop them from cooking further

4 Nested

You can even nest lists of different types:

1. Dog
   (a) Labrador
       i. English Labrador
       ii. American Labrador
   (b) Alsation
   (c) Pug

2. Cat
   - Persian
   - British shorthair
   - Siamese
   - Bengal

3. Elephant

   Elephants are large mammals of the family Elephantidae and the order Proboscidea. Two species are traditionally recognised, the African elephant (Loxodonta africana) and the Asian elephant (Elephas maximus), although some evidence suggests that African bush elephants and African forest elephants are separate species (L. africana and L. cyclotis respectively). Elephants are scattered throughout sub-Saharan Africa, South Asia, and Southeast Asia.

4. Zebra
